\$10 admission will get you a rocking good time  
Music—raffle prizes—50/50—light snacks  
Cash bar

In April 2014, Susan Yanowsky was diagnosed with Inflammatory Breast Cancer. IBC is the rarest and most aggressive form of breast cancer that exists in the world today. Within a matter of weeks, Susan was later diagnosed at stage 3 of breast cancer. Just a few weeks prior to her diagnosis, her husband lost his job and their health insurance due to an unjust cause. A battle they continue to fight to this day. With no health insurance, jobs, or support; Susan and her family are in desperate need of your generosity.

We believe in miracles. Giving up is not an option!!
